Easily secured to H-beams and I-beams.

Attach a chain block or hoist to enable suspending and horizontal pulling work.

A highly anticipated new series!

NEW

BEAM CLAMP

SBC5S

Features

- Ideal for use with chain blocks and hoists.
- Secures firmly to beams (H-beams and I-beams), allowing hooks of chain blocks, hoists, etc. to be attached for suspending.
- Suitable as a connecting fitting to beams at all kinds of job sites, including factories and construction sites.
- Can be easily attached and removed simply by turning the handle.
- Equipped with a hex socket screw to prevent the screw from loosening.

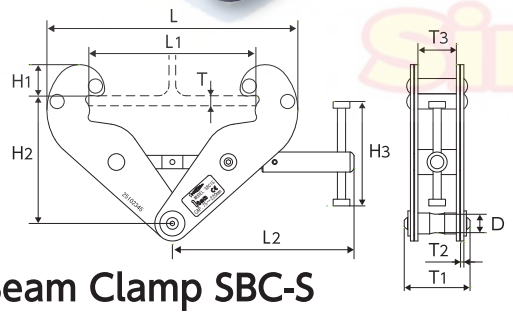

Example of Use

Suspending

Horizontal pulling
